

## **PRESS RELEASE**

June, 2010

### **Ligchine Distribution Agreement**

Bartell Morrison Inc. (B Mi) is pleased to announce that it has acquired the exclusive World Wide distribution rights (excluding USA and Mexico) for the Ligchine "ScreedSaver™", a wireless remote controlled fully automatic laser screeding machine. This is the latest technology in the fast changing world of concrete laser screeding.

"This machine will enable small and mid-sized flatwork Contractors to compete for work that requires FF50 flatness specifications" said Tom Foskett, President of Bartell Morrison Inc.

B Mi is very excited about broadening our product range with this advanced technology. This machine screeds up to 5,000 square feet/hour (460 sq meters) and yet it can be purchased for less than one third (1/3) of the price of the big ride on machines - this is a huge factor in today's economy! The quality, potential labour savings and initial cost of entry are significant points of interest and advantages for the flatwork industry.

Ligchine International, LLC President and founder Gary Ligman said "this machine is made with world class components and has been scaled to maximize production while maintaining conventional size for ease of transportation and on-site maneuverability. This combination along with a very attractive price should revolutionize how floors are placed in the near future"

For more information please contact Bartell Morrison Inc. directly and ask for Bruce Lyons ([blyons@bartellmorrison.com](mailto:blyons@bartellmorrison.com) or 1-866-501-1683 or direct at 905-364-4184) or visit either Companies web site to view the machines capabilities in action.

Bartell Morrison Inc. (B Mi) has been a leading manufacturer of concrete finishing equipment for more than 60 years. Bartell power trowels both walk behind and ride-on models and Morrison truss screeds are the choice of the construction industry around the world. The equipment is designed, engineered and built for a competitive edge through greater productivity, durability and efficiency.
